

# Living on the Edge: Agriculture in Periurban Mexico City

**Our Outcome:**  
**Research Archive**  
 Identified sources  
 by applying  
 keywords  
 focusing on the  
 triple bottom line  
 of sustainability

**Joint Venture**  
 to create  
 new opportunities  
 for sustainable,  
 resource-efficient  
 living  
 in periurban areas.

**Isla Urbana: Rain water harvesting process**

**Sistema Biobolsa: biodigester process**

We are facing a new era of positive sustainable changes in developing countries, and Mexico is one of them. Our capstone group had the unique opportunity to meet wonderful entrepreneurs during our Spring break trip.
